

Gas Energy Australia's 2026 National Forum brings together the leaders and key decision-makers across the LPG and associated gas sectors. The 2026 event will be held over 2 – 4 June 2026 at The Sydney Masonic Centre.

The Program brings together experts to share their insights into the policies and practical considerations to position LPG to be an important part for Australia's clean energy transition.

Sessions will cover renewable liquid gases, customer impacts and new technologies, alongside the latest updates on industry standards, regulation, logistics and operations.
